

Fragment re-created on bottom navigation view item selected

Solution

```
private void changeFragmentForBottomNavigationView(Bundle savedInstanceState, Fragment fragment) {  
    if (findViewById(R.id.fragment_container) != null) {  
        if (savedInstanceState != null) {  
            return;  
        }  
  
        FragmentTransaction fragmentTransaction = getSupportFragmentManager().beginTransaction();  
  
        Fragment curFrag =getSupportFragmentManager().getPrimaryNavigationFragment();  
        if (curFrag != null) {  
            fragmentTransaction.detach(curFrag);  
        }  
  
        Fragment fragmentFromManager = getSupportFragmentManager()  
            .findFragmentByTag("BOTTOM_FRAGMENT_"+fragment.getClass().getName());  
        if (fragmentFromManager == null) {  
            fragmentFromManager = fragment;  
            fragmentTransaction.add(R.id.fragment_container, fragmentFromManager,  
                "BOTTOM_FRAGMENT_"+fragment.getClass().getName());  
        } else {  
            fragmentTransaction.attach(fragmentFromManager);  
        }  
  
        fragmentTransaction.setPrimaryNavigationFragment(fragmentFromManager);  
        fragmentTransaction.setReorderingAllowed(true);  
        fragmentTransaction.commitNowAllowingStateLoss();  
    }  
}
```
